What is Avian Influenza (AI)?
- AI is a virus carried by migratory waterfowl (ducks and geese).
- Domestic poultry (chickens, turkeys, fowl) are susceptible and will become very sick.
- The virus is believed to have originated in Eurasia and spread into Canada and the Atlantic Flyway through wild geese and ducks.
- Migratory bird flyways cross the United States. Delaware is in the Atlantic Flyway.

**KNOW THE WARNING SIGNS!**
- Lack of energy and appetite
- Decreased egg production or softened/misshapen eggs
- Swelling of the head, eyelids, and comb
- Purple discoloration of the wattles, combs, and legs
- Stumbling, falling down, diarrhea
- Sudden death

**HOW IS THE DISEASE TRANSMITTED IN BIRDS?**
- Foot traffic
- Secretions from birds’ mouths, nostrils, eyes, excrement
- Contact with infected droppings
- Movement of infected birds
- Contaminated clothing and equipment

If you have sick or dying birds in your backyard flock, contact:
