DELAWARE DEPARTMENT OF
AGRICULTURE

Delaware Nutrient Management
Approved Soil Testing Laboratories

Guidance:

- The following labs participate in the North American Proficiency Testing (NAPT) or Agricultural Laboratory Proficiency (ALP) Program and offer the Mehlich-3 agronomic soil test
- Available soil testing services and fee schedules can be determined by contacting the laboratory directly via phone or website. Assume payment is due at the time of sample submission
- Select packages that use the Mehlich-3 extraction method for nutrient (P and K) analysis. The Mehlich-3 extraction is available at all approved laboratories.
- Soil sampling depth should be 6-8 inches for agronomic samples (8 inches recommended) or 2-4 inches for established turfgrass (4 inches recommended)
- Nutrient application rates must be based on University of Delaware (UD) soil test interpretations and nutrient management recommendations to maintain regulatory compliance
